

Local sourcing

THE PURBECK Ice Cream team has been committed to sourcing local ingredients for its ice creams and sorbets since day one when milk came direct from the cows on the company's farm.

Says **Hazel Hartle**, co founder of the company: "It makes perfect sense to source as much of everything from as close to home as possible. We start with sourcing from within Purbeck and if what we desire is not available, we'll look within Dorset. If it's still not there we'll spread the search to within the South and then

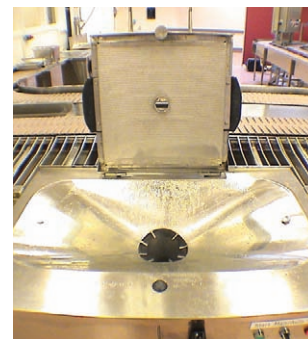

from within Britain and only venture outside these boundaries if what we need is either not available or is of too poor quality and therefore of no use."

Countrystyle partners Meiko MicroVac

A UK-BASED waste and recycling company, Countryside, has become the exclusive local waste management partner for Meiko's MicroVac, an award-winning high vacuum food waste system.

The MicroVac is designed to handle, transport and store food waste in a range of catering sites using high vacuum to transport food waste from the point of disposal to the point of storage. The waste is finally processed and used to create nutrient-rich, peat free fertiliser for local land owners.

Meiko's MicroVac recently won the *Caterer & Hotelkeeper* product excellence award in the Hygiene and Waste Management Category 2008.

Cuisine Naturelle

Upgrade to first class...

The Cuisine Naturelle range of high quality accompaniments has been specially created for First and Business Class catering. We have extensive experience in airline catering, and our products are flying 24 hours a day, 7 days a week all over the world.

Take a bigger dip with our new larger 50g range of dips, sauces, salsas, dressings and chutneys!

Our new innovative range of larger 50g dip pots offers our high quality meal accompaniments in a larger sized individual portion than our already successful range of 1.5g – 28g dip pots, and to further give the ability to include particulates (chunks!) within the pots. (Naturally, our current 'smooth' range continues in the 1.5g – 28g sizes).

This means we can offer dip pots with our standard *and* bespoke range of restaurant quality chutneys, compotes, salsas and sauces which have previously been limited to bulk food service containers.

See a sample of the range, right, or contact us about our bespoke NPD service. Or visit our new website where you'll find full information on dips, as well as all our products.
